1 waiting Scheduled for Jan 14, 2023

The Institute for Future Health is hosting a hybrid (in-person and Livestream) conference on January 14th, 2023, focused on building the knowledge of cardiac amyloidosis amongst Arizona clinicians. This event will be one of the first exclusively dedicated to cardiac amyloidosis. Cardiac amyloidosis is a disease of protein misfolding that leads to congestive heart disease, disabling neuropathy, and other systemic conditions. Cardiac amyloidosis can be caused by transthyretin **Show more**

Cardiac Amyloidosis supported in part with an independent educational grant from Pfizer.

Thank you to:
